

The graph displays the monthly variation of the number of COVID-19 cases in the Republic of Serbia from 2019 to 2023. The x-axis represents the year, with labels for 2019, 2020, 2021, 2022, and 2023. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a highly volatile trend with significant peaks and troughs, particularly in 2020 and 2023. The highest peak is in early 2023, reaching nearly 100,000 cases. Other notable peaks occur in late 2020 and early 2021, both reaching around 80,000 cases. The lowest points are in late 2019 and late 2022, both falling below 10,000 cases.
